Beach season, weddings, and family vacations are all exciting activities to look forward to in the summer, and with the season coming upon soon, it's time to start thinking about getting that beach body you've been wanting. If you're thinking of improving your body to boost your self-esteem or simply to regain the body you had before having children, read on to see the latest in plastic surgery procedures for your best body yet.

### **BTL Vanquish™**

This cutting-edge technology in permanent non-surgical fat removal is ideal for those who only want to eliminate a bit of fat here and there, such as thighs, back, and stomach. This procedure creates those curves and contours that people dream of and celebrities boast on the red carpet. Vanquish™ uses a device that delivers radiofrequencies to specific areas of the body to target fatty areas to gently and painlessly remove them. This process is excellent for trimming fat from your hips, waistline, buttocks, thighs, and other areas of the body where excess fat has been stored. The procedure takes 30-45 minutes in four separate treatments to fully see results.

### **Cellfina Cellulite Treatment**

This cutting-edge treatment involves a minimally invasive procedure that targets the primary cause of cellulite and eliminates these ugly fatty deposits that dimples the skin. The award-winning MedSpa at Southwest Plastic Surgery is the first and only practice in El Paso to offer this treatment. It's a procedure that only uses a small needle-like device to target the connective bands that are found on the

outer layers of the skin creating tension that causes the unattractive skin dimpling.

### **Liposuction**

This is a very effective and popular procedure for eliminating fat in specific areas of the body, including the stomach, thighs, buttocks, and other areas where fat builds up. It's an efficient treatment for getting rid of that unwanted fat and getting that sculpted body you've been dreaming of.

### **Brazilian Butt Lift**

For those who want a more rounded buttock, this procedure is perfect; a Brazilian butt lift procedure uses excess fat taken from the thighs, waist, hips, or abdomen and uses that unwanted fat to inject into the buttock area to give it a more rounded, contoured shape.

To get your body ready for summer, renew your appearance, restore your self-confidence, and revive that old vitality you're missing, call Southwest Plastic Surgery today and find out more about these treatments and others that we offer at our practice.
